**AdWhirl Open Source SDK for Android
Setup Instructions**

# AdWhirl Open Source SDK Setup Instructions

The AdWhirl Open Source SDK contains the code for your Android application to display ads from different ad networks. This set of instructions is based on Eclipse.

## Setting up the AdWhirl SDK

1. Add the permissions in the README file to your AndroidManifest.xml

2. Get the ad networks' Android JAR files from their respective websites. Copy their JARs and the AdWhirl JAR into your /libs directory

3. Add the AdWhirl JAR (and any ad network JARs) to your build path

4. Add the code in the README to create and add an AdWhirl Layout

5. Import the AdWhirlLayout package
